

WORKING WITH LOGS

Krzysztof Otrębski
GeeCon 2015

WHO AM I

- ☀ Scala developer at Ocado @Kraków
- ☾ Open source contributor

AGENDA

- Why have I started to develop logs application
- What makes OtrosLogViewer unique
- What does 'I' stand for in IDE
- OtrosLogViewer views for humans

WHY HAVE I STARTED TO DEVELOP LOGS APPLICATION

- `grep | less` was not enough to deal with logs
- `less` was not available on every machine

WHAT DOES DISTINGUISH IT FROM OTHER LOG VIEWERS

- Focused on developer tasks

WHAT DOES 'I' STAND FOR IN IDE

- **I** ntegrated
- **D** evelopment
- **E** nvironment

HOW TO INTEGRATE

- OtrosLogViewer
- Eclipse with OtrosLogViewerEclipsePlugin or IntelliJ with OtrosJumpToCode plugin
- Any logs with stack trace or location info

CUSTOMISED VIEWS FOR HUMANS

- XML in log
- JSON in log
- any computer friendly text in log?

SUMMARY

- OtrosLogViewer can make your life easier than `grep` | `less`
- find out more about the project on <https://github.com/otros-systems/otroslogviewer>
